Product Data Sheet for QT Iron Pep (Iron source for Baby Pigs)

PRODUCT CODE: 4792

APPLICATION:

A supplemental source of oral iron for baby pigs.

USE DIRECTIONS:

Starting when pigs are 3 days of age, feed 1½ ounces of Iron Pep to each litter every 3 days, or give ½ ounce daily. Continue this schedule until the pigs are eating regular amount of creep feed, usually when about 4 to 5 weeks old.

When starting to feed a creep ration, usually better acceptance of the creep ration is obtained by topdressing the feed with Iron Pep.

Iron Pep should be fed in a place convenient to the pigs. Because pigs will rood and eat Iron Pep readily, it is best to feed it in a shallow pan ailed to a board or on a clean place on the floor where they will be creep-fed.

The enclosed measure holds approximately 1½ ounces.

CONCENTRATION:

Elemental Iron (Fe), minimum.....1.9%.

CHARACTERISTICS:

- Highly palatable, free flowing product.
- Contains a highly available nutritional source of iron which helps prevent iron deficiencies in pigs.
- Attracts baby pigs to creep feed. Generally increases creep feed consumption.

INGREDIENTS:

Sphagnum moss hydrated, ferrous sulfate, ascorbic acid, copper sulfate, cobalt sulfate, dried cane molasses, cane sugar, milk sugar, dried skimmed milk, polysaccharide complexes of zinc, manganese, iron and copper, (sodium benzoate and calcium propionate as preservatives).

STORAGE:

Keep out of reach of children. Store in a dry place.

PACKAGING:

12.5 pound poly bag, 4 per case.
