Dura-C Protected Vitamin C

PRODUCT CODE: 5998

APPLICATION:

Specialized form of coated ascorbic acid (Vitamin C) to be utilized in feed rations. This unique formula will improve ascorbic acid stability during pelleting processes, in addition to minimizing dissipation and/or chemical reactions in water and feed.

USE DIRECTIONS:

250 grams per metric ton of feed or use at a rate specified by a Nutritionist.

CONCENTRATION:

80% ascorbic acid by weight.

CHARACTERISTICS:

- White powder
- Stable form of Vitamin C for use in animal feeds
- Reduced oxidation in the presence of heat and water
- Flowable powder for easy handling and formulation
- Coating repels water and increases stability in pelleting
- Coating is broken down in the intestine of the animal
- Moisture is less than 5%

INGREDIENTS:

Ascorbic Acid, Calcium Phosphate, Calcium Silicates and Vegetable Oils. BHT and BHA (as preservatives).

STORAGE:

2 year shelf life under ambient conditions in original container.

PACKAGING:

25 kilogram paper poly bag.
